

ImGui::BeginDragDropSource

ImGui::BeginDragDropTarget

ImGuiWindow::GetIDFromRectangle

```
graph LR; A[ImGui::BeginDragDropSource] --> C[ImGuiWindow::GetIDFromRectangle]; B[ImGui::BeginDragDropTarget] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'ImGui::BeginDragDropSource' and the bottom box contains 'ImGui::BeginDragDropTarget'. On the right, a single grey rectangular box contains the text 'ImGuiWindow::GetIDFromRectangle'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the grey box, indicating that both 'BeginDragDropSource' and 'BeginDragDropTarget' utilize the 'GetIDFromRectangle' function from the 'ImGuiWindow' class.
