

ImDrawData::DeIndexAllBuffers

ImChunkStream::swap

ImVector::swap

```
graph LR; A[ImDrawData::DeIndexAllBuffers] --> C[ImVector::swap]; B[ImChunkStream::swap] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left, labeled 'ImDrawData::DeIndexAllBuffers' and 'ImChunkStream::swap', have blue arrows pointing to a single gray rectangular box on the right labeled 'ImVector::swap'. This indicates that both functions on the left utilize the 'swap' method of the 'ImVector' class.
