

ImGui::TableGcCompactTransient
Buffers

ImGui::TableRemove

ImPool::GetIndex

```
graph LR; A[ImGui::TableGcCompactTransientBuffers] --> C[ImPool::GetIndex]; B[ImGui::TableRemove] --> C;
```

The diagram illustrates two function calls to `ImPool::GetIndex`. The first call originates from `ImGui::TableGcCompactTransientBuffers`, and the second call originates from `ImGui::TableRemove`. Both calls are represented by blue arrows pointing to the `ImPool::GetIndex` function box, which is shaded gray.
