

ImGui::CollapseButton

ImGui::UpdateMouseMoving
WindowEndFrame

ImGui::StartMouseMovingWindow

```
graph LR; A[ImGui::CollapseButton] --> C[ImGui::StartMouseMovingWindow]; B[ImGui::UpdateMouseMovingWindowEndFrame] --> C;
```

The diagram illustrates a control flow where two functions, `ImGui::CollapseButton` and `ImGui::UpdateMouseMovingWindowEndFrame`, both call the function `ImGui::StartMouseMovingWindow`. The call from `ImGui::CollapseButton` is represented by a blue arrow pointing to the top of the `ImGui::StartMouseMovingWindow` box. The call from `ImGui::UpdateMouseMovingWindowEndFrame` is represented by a blue arrow pointing to the bottom of the `ImGui::StartMouseMovingWindow` box. The `ImGui::StartMouseMovingWindow` box is shaded gray, while the other two are white with black borders.
